

Professional Hair Growth Concept

Hair Growth Concept.

The four strongest supplements for effective and revitalizing hair growth

What is the mesoskinline® Hair Growth Concept?

The ideal combination of professional mesotherapy treatments and effective hair growth supplement products are united in mesoskinline® Hair Growth Concept.

It is developed for quick and stable results and is hereby proven to be able to reduce and in many cases stop the hair loss - effective both for men and women of any age or ethnic background.

The Hair Growth Concept is a 4 months treatment programme, which includes 8-10 mesotherapy sessions (2-3 x month) and three active home supplements: active serum for scalp, hair growth capsules as food supplement and specially designed shampoo for strengthening the hair.

Maintenance: 1-2 sessions every third month and at least one supplement is recommended.

- ✓ affordable long-term hair growth - painless - vegan - hydrates and soothes scalp
- ✓ no side effects - calming action on scalp psoriasis and seborrheic dermatitis

mesoskinline® Hair Growth Concept Timeline

Meso Hair Loss Control

Boosts the hair growth

Active ingredient cocktail for non-invasive mesotherapy treatment of hair and scalp, which, with the help of mesoskinline's safe plastic needle module designed to stimulate blood and lymph circulation and to increase product penetration into the scalp by up to 97%.

MESO HAIR LOSS CONTROL contains vasodilating substances that, similar to Minoxidil, increase blood circulation and supply the scalp with more oxygen. In addition, this cocktail is also rich in important vitamins, amino acids and other active ingredients that hair needs to grow.

The list of main active ingredients includes:

- **Saw Palmetto:** Is proven to stimulate hair growth while treating the enlarged prostate, no side effects.
- **Biotin, vitamin B7:** For cell regeneration/metabolism.
- **Ginseng Root Extract:** Promotes the cell growth and production of collagen in the hair.
- **Panthenol, provitamin B5:** Enables the skin to store more moisture.
- **Aminoacids:** Increase the absorption of keratin in the hair,
- **Allium Bulb Extract:** Onion extract, regenerates scalp and strengthens the hair roots.
- **Zinc PCA:** Antioxidant effect, regulates sebum production.
- **Hydralyzed Soy Protein:** (ensures voluminous, smooth and glossy hair structure) and 5-alpha reductase inhibitor (this enzyme decreases conversion of testosterone to DHT, which is utterly important as DHT causes hair loss for both men and women).

Box contains:

- 10 x 5 ml vials
- 10 x transparent pipettes
- For ten treatments

Step 2

HS Capsules

Long-term support for the hair

The HS dietary supplement tablets support and strengthen the hair in the long run. The capsules ensure that the body is supplied with all the nutrients that the hair needs to grow during the entire mesotherapy treatment. A beautiful side effect is also that in addition to the hair, the foot and finger nails also gain a more beautiful appearance. For a good result, it is important that the capsules are disciplined daily for the entire duration of treatment.

In hair loss, it is often the case that hormones such as e.g. Testosterone can be converted to DHT (Dihydrotestosterone) in large amounts. The DHT is then broken down over the hair root by the body, which leads to a shortening of the growth phase and a thinning of the hair.

The ingredients of the HS capsules help to inhibit the action of the enzyme "5-alpha-reductase", which converts testosterone to DHT. In addition to other contents, active ingredients such as biotin (for the structure), copper (for the pigmentation), vitamin B9 and iodine (for the metabolism) also play a major role here.

This combination promotes cell renewal and supports hair growth as well as pigmentation. Herbal ingredients (eg ginseng root extract) help to increase the resistance to stress, which can have a great influence on hair growth.

Box contains:

- 60 Capsules

mesoskinline® Hair Growth Concept
HS capsules

Dose:

2 capsules per day for 4 months. Ideally before or during breakfast.

Maintenance:

1 month (60 capsules) every October and March.

Step 3

Tricocure Hair Serum

For home use

Tricocure is a serum specially developed for hair. Regular local application to the scalp (3ml 1-2 times a day) with a pipette widens the vessels and the active ingredients reach their target directly. Tricocure provides the hair follicles with numerous nutrients such as:

Kopexil and Niacin: (2,4 Diamino Pyridine – 3 Oxide) (2,4 DPO) works similarly to Minoxidil as a vasodilator and promotes oxygen supply to the scalp but without the side effects such as burning and itching.

Biotin (Vitamin B7): Supports cell regeneration, helps to bind fatty acids and is required for converting food into energy. Helps to grow thicker hair. Biotin is generally important for the body, not just for the hair, e.g. also for beautiful nails.

CG-VEGF: Growth factor that stimulates angiogenesis (new blood vessel formation) and the associated nutrient supply at the base of the follicle.

Saw Palmetto Extract (Serenoa Repens): Disrupts hormonal signals and decreases the absorption of DHT by the hair follicles.

Beta-Sitosterol: Natural plant extract with androgen (hormone) inhibiting properties.

Capixyl: Mixture of two ingredients. Biochanin A is derived from red clover and helps prevent the conversion of testosterone to DHT in androgenic alopecia.

Acetyltetrapeptide-3: is a peptide that stimulates tissue remodeling.

Pyridine(VitaminB6): Promotes the formation of melanin (gives hair color).

Other substances: Pantothenic acid (vitamin B5) and ginseng root extract (help increase resistance to stress, which is a major factor in hair growth).

Use: Massage gently into problem area or whole scalp 1-2 times a day (3-6 ml). Do not rinse off for 8 hours.

Box contains:

- 4 bottles of 25mL e.a.

Step 4

Box contains:
• 1 airtight 150 ml bottle

Tricocure Mousse Hair Loss Shampoo

Obtain stronger, healthier, more structured hair.

The harmonized effect of Caffeine and Keratin assisted by the combination of glucose-based raw materials, have an exclusive mode of action: they penetrate deep into the cortex of the hair to create new ionic and hydrogen bonds. Damaged keratin re-structures and strengthens, restoring manageability to the hair.

A new natural product that combines nicotinic acid and refreshing natural menthol strengthens the formulation. An effective micro-massage to the scalp will give a pleasant feeling of well-being by simultaneously stimulating the microcirculation with a "hot / cold" effect. Salicylic acid has a cleansing and purifying action on the scalp and hair.

Regular use of the shampoo helps to obtain stronger, healthier, more structured hair.

Actives:

CAFFEINE ANHYDRATE Caffeine is known for its energizing power. The very famous psychotropic substance affects the hair roots by stimulating growth and making them stronger and firmer. Caffeine only affects the scalp for 24 hours. Therefore, regular use is recommended to bring the right energy to the stimulation of the hair bulb.

HYDROLYZED KERATIN Hydrolyzed keratin has a substantiating, protective, volumizing and film-forming activity. Keratin is a protein made up of long fibrous chains of sulfur amino acids (including cysteine). These bonds, called sulphide bridges, ensure rigidity and solidity to the hair.

FIBERHANCE BM SOLUTION New patented solution designed for hair strengthening. Glucose-based chemistry evolves with a unique mode of action: by wedging deep into the stem, it creates new bonds by strengthening the damaged cortex, restructuring and strengthening it.

SALICYLIC ACID Salicylic acid has a purifying action on the scalp and facilitates elimination of the scales. Reduces the itching sensation. Removes dead scalp and hair cells. It helps keep the epidermis clean and hygienically pure, increasing its hydration.

Use: 2-3 per week. Dose the foam on the palm of the hand and massage gently on the scalp to stimulate microcirculation. Leave the product on for 10 minutes, so that the benefit of the active ingredients can reach the scalp. Rinse with warm water and dry the hair by gently dabbing with a towel.

Dermatologically Tested

Step 1

Step 2

Step 3

Step 4

Hair Loss Control

- ✓ Boosts the hair growth
- ✓ Dilates the vessels and promotes oxygenation
- ✓ Intensively nourishes the hair

HS Capsules

- ✓ Long-term nourishment for the hair
- ✓ Anti DHT Effect
- ✓ Ideal supplement during the entire course of treatment

Tricocure

HAIR SERUM FOR HOME USE

- ✓ Strong serum for the application at home
- ✓ Active ingredients succeeded immediately
- ✓ Promotes blood circulation

Tricocure

MOUSSE HAIR LOSS SHAMPOO

- ✓ Prevents an itchy scalp
- ✓ Rebuilds stronger hair
- ✓ Ensures healthier hair
- ✓ 3x better hair structure

mesoskinline® Hair Growth Concept

- ✓ The ideal Meso Hair Loss Control treatment
- ✓ Enriches the hair with nutrients
- ✓ Promotes blood circulation and oxygen supply
- ✓ Long-term concept
