

Innovative non-invasive
mesotherapy solutions

mesoskinline

MILANO - HAMBURG - COPENHAGEN *By Alexandra Kjaersfeldt*

mesoskinline meso-cocktails are very effective for regenerating and rejuvenating the skin

The skin is smoothed and additionally hydrated. Active substances (**mesoskinline** meso-cocktails) containing hyaluronic acid are gently implanted in the upper skin with the specially designed MESO modules or equivalent modules/devices.

The meso-hygiene modules allow a safe and effective intrusion of **mesoskinline** meso-cocktails into epidermis. without any pain.

The active ingredients provide the skin with moisture and stimulate the regeneration of collagen and elastic fibres.

The effectiveness and efficiency of **mesoskinline** meso-cocktails will become apparent after just a few applications. You will be convinced by the immediately visible results.

mesoskinline meso-cocktails are produced in the EU in a recognized pharmaceutical laboratory with more than 20 years of experience in the research, development, innovation, manufacturing and distribution of medical devices, aesthetic and skin care solutions for beauty and medical institutes.

- All raw materials are selected by us to meet the requirements of medical devices. The production process is controlled in accordance with ISO 9001 and ISO 13485 quality systems.
- After production, all products are tested and inspected, including packaging, etc.
- State-of-the-art professional mesotherapy solutions.
- Target solutions, repair, photo-protection, peelings.
- Safe and innovative approach for beauty therapists and dermatologists.

Our mission is to be the market leader in:

- Products and equipment for professional practitioners
- Developing new products with unique ingredients together with some of Europe's most talented researchers and laboratories
- Cosmetic, medical, aesthetic treatments and training

We strive to constantly maintain the latest knowledge and the strongest competences.

Become a Distributor or Partner

mesoskinline is the innovator and knowledge leader in the non-invasive mesotherapy industry and offers high quality products.

Do you wish to collaborate with **mesoskinline** in your country or region and become a **mesoskinline** Partner or Distributor?

Contact us for your possibilities.

MESO FRESH VITAMIN

rebuilding the skin

Revive the skin with MESO FRESH VITAMIN

MESO FRESH VITAMIN is an important product within mesotherapy that stimulates and revives tired skin.

The product is a good choice for treating dehydration, wrinkles and sun damage. Treating with MESO FRESH VITAMIN helps achieve a good level of cellular hydration and good biochemical and biological architecture.

Thanks to the content of hyaluronic acid, it is also recommended for use around e.g. the eye area, which will lead to significant improvement after just 1-2 treatments.

Fast, visible results

MESO FRESH VITAMIN consists of natural substances of a high quality, which are therefore easily absorbed by the skin. This gives fast, visible results.

MESO FRESH VITAMIN is gentle and is often used together with other treatments. The product does not prevent ageing, but delays the process significantly. Through treatment, the skin gains a fresh and youthful glow, which is already visible after the first treatment. MESO FRESH VITAMIN is rejuvenating wellbeing at its best.

The treatment is a targeted health boost for the skin, and with its wrinkle-reducing properties, the product is also well suited to patients who smoke and who have not followed a skincare regime.

Reduce and remove wrinkles with MESO FRESH VITAMIN

Just like several other **mesoskinline** products for professional treatments, MESO FRESH VITAMIN contains hyaluronic acid, which is produced naturally in the body and is found in tissue and body fluids in all human beings.

The molecule has a unique ability to bind large quantities of moisture in the skin. Hyaluronic acid's hydrating properties are particularly beneficial for wrinkle reduction. For minor wrinkles, such as around the eyes, a single MESO FRESH VITAMIN treatment is sufficient, while deeper wrinkles need repeated treatments.

Gentle and effective

MESO FRESH VITAMIN is both gentle and effective and is suitable for multiple skin types, damage and signs of ageing, and the treatment improves both collagen fibres and micro-circulation in the skin.

The result is a firmer and a more supple skin that radiates health. The product has no side effects, allowing you to treat larger areas simultaneously without any discomfort. The ingredients contained in **mesoskinline** products are all approved remedies, which have been selected in accordance with general medical practice. They are packed in clinical conditions in practical vials and disposable ampoules to avoid waste or oxidation. The products are ready to use and thereby quick and easy to apply in a busy working day.

MESO FRESH VITAMIN is not recommended for pregnant women, patients with acne or severe skin problems.

Active ingredients (34)

MESO FRESH VITAMIN consists of natural substances of a high quality, HA 1 %, Retinol, 21 amino acids, Multivitamins (such as D-Biotin, Vitamin A, B12, Acetate), Hyaluronic acid.

MESO FRESH VITAMIN

rebuilding the skin

Main treatment areas

- Face
- Lip area
- Cheeks

This treatment benefits

- Anti-ageing
- Improves stressed skin
- Partially reduces minor wrinkles
- Improves dull, uneven skin
(for patients who smoke or who have not cared for their skin)
- Reduce deeper wrinkles (expression lines)
- Lifting around the eye area
- Moisturising with toning effect

TREATMENT FREQUENCY / TIP

- Once a week for 4-6 weeks
- Highly effective for dull, grey skin that hasn't been protected from the sun or which hasn't been benefited from a regular care regime.

Contents:

- 10 x 5 ml vials
- 10 x transparent pipettes

- For 10 treatments

Item no.:

MST105

MESO CHEEK LIFT

activates cell reconstruction

MESO CHEEK LIFT activates cell reconstruction

Lines caused by facial expressions are always visible. We use about 60 muscles while communicating both through speech and facial expressions. Frowning, lifting of eyebrows, laughing, pulling a face are some typical facial expressions that we use to communicate. As time passes and with frequent use of these facial movements, these wrinkles persist and become permanent deep wrinkles on the forehead, laughter lines and crow's feet. Besides injection there is a clear consumer need for effective, safe topical treatments.

MESO CHEEK LIFT is a non-invasive form of mesotherapy based on the regenerative and stimulating properties of peptides.

The formula of MESO CHEEK LIFT contains SYN®-AKE. A small molecular weight synthetic peptide that smoothens expression lines by topical application. SYN®-AKE has a natural inspired mechanism. It mimics the activity of Waglerin-1, a natural occurring peptide found in temple viper venom (*Tropidolaemus Wagleri*). Waglerin-1 has a strong ability to relax muscle contraction.

Benefits

- Age-killing effect particularly effective against expression lines
- Visible deep wrinkle smoothing after only one month
- Helps your face to relax without losing the ability to express yourself

MESO CHEEK LIFT nourishment for a strong, supple skin

MESO CHEEK LIFT is a non-invasive form of mesotherapy where the three main vitamins for the skin well-being (A-C-E) are present in the most stable forms to ensure complete absorption.

Vitamin E and C

Due to radical scavenging activity, they protect the skin from external factors (pollution, UV-A UV-B) that can be dangerous for the skin and cause premature aging.

Vitamin A

Retinol keeps the skin intact and repairs damaged cells. Vitamin A is, in fact, very useful in case of chapped skin, reddened and irritated. It also performs a sebum-regulating action, which balances the production of skin sebum.

Active ingredients (30)

Sodium PCA, Vitamin (A-C-E), SYN®-AKE.

MESO CHEEK LIFT activates cell reconstruction

Main treatment areas

- Face
- Body

This treatment benefits

- Anti-ageing, early signs of ageing
- Improves the skin's texture and connective tissue
- Reduce wrinkles
- Reduce scar tissue
- Reduce stretch marks

TREATMENT FREQUENCY / TIP

- Once a week for eight weeks
- Highly effective where the skin has lost its elasticity (especially on the cheeks).

Age

- 35 +

Contents:

- 10 x 5 ml vials
- 10 x transparent pipettes
- For 10 treatments

Item no.:

MST102

Organic Silicium

Silicium is a natural trace mineral and an essential component of the skin. By interacting with elastic proteins in dermis, such as collagen fibers, elastin and proteoglycans, the silicium ensures optimal healthy solid skin structure, connective tissue strength and elasticity.

In addition, many studies indicate that Silicium is capable of stimulating skin cell metabolism (e.g. collagen production, contractility), strengthens the cartilage, promotes wound healing, and strengthens both skin and mucous membranes.

DMAE: Several studies have shown that the current use of DMAE can significantly enhance the appearance of the face and its rejuvenation.

It has been supplemented with the components that help to correct the development of muscle tissue, aging and fatigue, cellular resuscitation, muscle stimulants, adynamia and muscle fatigue.

MESO EYE LIFT

anti-flaccidity treatment

The most effective meso-cocktail for firming the skin

MESO EYE LIFT is an effective meso-cocktail developed to prevent the skin's signs of ageing.

The meso-cocktail contains all the intermediate substances in the Krebs cycle. DMAE and carnosine, both of which are known for their firming and strengthening properties, are the central energy-giving part of aerobic oxidation.

MESO EYE LIFT stimulates and activates the relative enzymatic functions on the mitochondria, which act as the cell's power plant.

It removes the barriers that occur in the cell's onset of the lactic acid phase

MESO EYE LIFT delays the skin's ageing process

Our skin ages because of different internal and external factors. Our genes play an important role, but other parameters such as smoking, diet, UV rays, stress and hormones also have a major effect.

In all instances, ageing damages both the skin cells, molecules and the extracellular matrix. The result is a visible loss of elasticity and firmness of the skin, which becomes wrinkled and loose.

When the body and skin fibroblast ages, there is a drop in the synthesis and in the maintenance of the extracellular matrix.

MESO EYE LIFT slows down this decline by adding the nutrients needed for the fibroblasts to function optimally and to gradually renew.

Firmer skin with no side effects

MESO EYE LIFT contains dimethylaminoethanol, or DMAE, which is known to increase the skin's firmness. Another important ingredient is dipeptide carnosine, a derivative of histidine, equally known for its firming properties.

MESO EYE LIFT has no side effects, and the treatment is compatible with other meso-cocktails and botulinum toxins. It is therefore both a gentle and effective agent for firmer and stronger skin. The meso-cocktail is also negative in doping tests.

Benefits

- Improves stressed skin
- Partially reduces minor wrinkles
- Improves dull, uneven skin
(for patients who smoke or who have not cared for their skin)
- Facial contours appear more defined
- Stimulates contraction of the skin muscular filaments with its firming effect
- Compatible with botulinum toxins
- Improves the skin's moisturising effect, captures free radicals and protects against further wearing.

Active ingredients (30)

DMAE, Amino acids, Multi vitamins (B1, B2, B6), Organic Silicium.

MESO EYE LIFT

anti-flaccidity treatment

Main treatment areas

- Face
- Around the eyes
- Neck
- Décolletée

This treatment benefits

- Anti-ageing, early signs of ageing
- Reconstructs the face's youthful shape and normal complexion
- Firms/lifts the skin and is also compatible with botulinum toxins
- Effective moisturiser
- Captures free radicals and protects against external skin damage
- Highly effective for damaged, mature and impure skin
- Specially designed for firming area around the eyes

TREATMENT FREQUENCY / TIP

- Once a week for 4-8 weeks
- Can also be applied to thin and dehydrated skin, where the upper face and neck need attention and extra firming.

Age

- 35 +

Contents:

- 10 x 5 ml vials
- 10 x transparent pipettes
- For 10 treatments

Item no.:

MST104

Elastin

Elastin is a highly specialized elastic protein which is found in the connective tissue of the skin and blood vessels. Elastin is also an important load-bearing tissue and used in places where mechanical energy is required to be stored. Revitalizes, nourishes and moisturizes the skin and reduces the appearance of wrinkles and fine lines. Gives skin and hair a protective layer.

DMAE

Dimethylaminoethanol, also known as DMAE or dimethylethanolamine, is an organic substance and an important antioxidant in the cellular plasma membrane. It is a precursor, which means a connection that forms another, in this case acetylcholine. Acetylcholine is a neurotransmitter that allows the passage of stimuli between the nerves and muscles. When applied to the skin, it has a firming effect as it stimulates muscle contraction. DMAE trials show that the substance makes skin firmer; firming the skin around the eyes and lips and also giving a defined contour of the face, including a firmer neck and jawline.

In vitro testing reveals that applying DMAE results in a significant swelling of the body's most important connective tissue, fibroblast. The swelling occurs in the vacuoles, which acts as a cellular reservoir. Some believe that DMAE is Botox in a cream form, but this is far from the truth. DMAE has the exact opposite effect, because DMAE stimulates the muscles, whereas Botox blocks and paralyses them. That's why DMAE is not recommended for deep wrinkles between the eyebrows, but is an effective agent against sagging skin and for firming the skin around the neck.

MESO NECK AND DÉCOLLETÉE LIFT

DMAE, elastin, organic silicium to restore the skin

Firm the neck and chin with MESO NECK & DECOLLETE LIFT

MESO NECK & DECOLLETE LIFT is an effective method to achieve firm, healthy skin. It is a non-greasy meso product for the facial area, which reduces wrinkles and, e.g. can be used to firm the skin on the neck area.

The treatment is completely harmless and without side effects, and therefore is an excellent alternative to other treatments such as Botox.

MESO NECK & DECOLLETE LIFT contains three important ingredients that are the key to achieving a successful, wrinkle-reducing result. MESO NECK & DECOLLETE LIFT is the first product to combine DMAE, elastin and methylsilanol, making it the most advanced wrinkle-reducing meso skincare product on the market today.

The significant elasticity is due to the protein's complex composition of cross-linked peptide chains. Parts of them fold in a way that enables the molecule to stretch 50-80% and still return to its original position.

MESO NECK & DECOLLETE LIFT mainly comprises amino acids, glycine, valine, alanine and proline. This is a specialised protein with a hefty molecular weight of 64 to 66 kDa.

As we age, the amount of elastin in our tissue reduces, and the skin loses its elasticity. With the right content of elastic, MESO NECK & DECOLLETE LIFT regenerates and rebuilds the skin elasticity and makes it look younger and firmer.

MESO NECK & DECOLLETE LIFT is a fantastic alternative to Botox. Its formula effectively reduces the appearance of fine lines and wrinkles on all skin areas, both face and body

Methylsilanol mannuronate

Methylsilanol mannuronate is an organic connection derived from seaweed. The seaweed plant is known for its detoxing properties, and methylsilanol mannuronate acts as an antioxidant that prevents the early signs of ageing.

Methylsilanol mannuronate has long-lasting, moisturising properties that fight the breakdown of collagen and elastin fibers. That's why it has a firming effect on the skin. The connection is also known to fight free radicals. In vitro testing shows that methylsilanol mannuronate normalises the cell's metabolism, is regenerating on the tissue and helps reduce orange peel skin without any side effects.

Methylsilanol mannuronate is a safe and natural ingredient used in skincare products, and The Environmental Working Group has declared the connection as 100% safe for cosmetic use.

The combination of DMAE, elastin and methylsilanol mannuronate makes MESO NECK & DECOLLETE LIFT a unique treatment for reducing wrinkles and firming the neck and jawline.

Active ingredients (12)

DMAE (a key antioxidant that strengthens fibroblasts and thus firms the skin), Elastin (a protein that helps the skin return to its original position), Organic silicium (Methylsilanol Mannuronate is an organic derivative of seaweed that binds moisture into the epidermis and therefore strengthens the skin).

MESO NECK AND DÉCOLLETÉE LIFT

DMAE, elastin, organic silicium to restore the skin

Main treatment areas

- Face
- Body
- Décolletée
- Neck

This treatment benefits

- Anti-ageing, early signs of ageing
- Firms the skin on the neck and décolleté
- Reduces the length and depth of wrinkles
- Prevents and reduces wrinkles or stretch marks
- Increases the skin's elasticity and stimulates collagen production

TREATMENT FREQUENCY / TIP

- Once every 7-10 days x 8
- Can be applied on all skin areas, and especially efficient around the neck and decolltee.

Age

- 40 +

Contents:

- 10 x 5 ml vials
- 10 x transparent pipettes
- For 10 treatments

Item no.:

MST106

MESO HAIR LOSS CONTROL

eight actions to reidentify

MESO HAIR LOSS CONTROL agent against hair loss

The product contains the exact composition of vitamins, amino acids and minerals needed to optimum benefits from the body's metabolism.

MESO HAIR LOSS CONTROL ensures permanent bioavailability and thus optimises the production of keratin proteins. The treatment ensures the exact composition of amino acids needed for healthy hair, and is an essential component of anti-hair loss agents.

MESO HAIR LOSS CONTROL is good for:

- Treating non-genetic hair loss
- Repairing and stimulating hair that has been damaged by environmental factors such as sun and pollution
- Reducing hair loss
- Repairs dandruff and the sebaceous glands and repairs thin and lifeless hair.

Saw palmetto: an efficient agent against hair loss

Saw palmetto is used mainly by men to ease symptoms of benign prostate hyperplasia, which is an enlargement of the prostate, but not a cancerous condition.

Studies of treating enlarged prostate with saw palmetto indicate that the palmetto also stimulates hair growth, and it appears that saw palmetto has the same effect as Finasteride, but without side effects.

MESO HAIR LOSS CONTROL ensures permanent bioavailability and optimises the production of keratin proteins. The treatment ensures the exact composition of amino acids needed for healthy hair, and is an essential component of anti-hair loss agents.

MESO HAIR LOSS CONTROL reduces hair loss, and in some instances the treatment can completely stop hair loss. After the recommended ten treatments with MESO HAIR LOSS CONTROL, the average diameter of the hair strand is increased, and the hair becomes fuller in appearance.

Biotin: strengthens hair

Biotin is a vitamin B that is part of several metabolic reactions and the regulation of sugar decomposition. Sometimes biotin is referred to as vitamin H or vitamin B7.

The vitamin is water-soluble and the body can never contain too much biotin as, at some point, it is always secreted through urine. It is partly due to this vitamin MESO HAIR LOSS CONTROL is so effective against hair loss and helps increase the health of the hair. Glucose is a significant energy source and is important both for maintaining the body and for ensuring it performs optimally. Biotin plays an essential role when the body processes glucose. This vitamin plays also an important role in the body's fight against wearing and tearing. Both growth and cell replication depends on biotin and the vitamin helps retain the hair's health and renewal, and also plays an important role in maintaining many of the body's other functions.

Biotin is a vitamin that keeps the hair healthy, strong and glossy. It is clinically documented that the body's level of biotin is just as fundamental as its level of other vitamins and minerals.

Active ingredients (44)

Saw palmetto, Panthenol, Cysteine, Taurine, Hyaluronic acid, Biotin.

MESO HAIR LOSS CONTROL

eight actions to reidentify

Main treatment areas

- Scalp

This treatment benefits

- Stops the hair loss process
- Stimulates the micro circulation
- Affects 5a-reductase inhibitors
- Regulates the production of tallow
- Nourishes the hair roots
- Increases the thickness of the hair strands
- Rebuilds the cuticles
- Strengthens the medulla
- Makes the hair glossy

TREATMENT FREQUENCY / TIP

- Once a week for ten weeks

Reduce or stop hair loss in eight stages

MESO HAIR LOSS CONTROL is a unique agent against hair loss, which fights the loss of hair and stimulates new growth. MESO HAIR LOSS CONTROL increases blood flow and aerates the scalp.

Contents:

- 10 x 5 ml vials
- 10 x transparent pipettes
- For 10 treatments.

Item no.:

MST101

Hydrolysed collagen renews the tissue

Hydrolysed collagen is collagen where the molecular bindings between the individual collagen threads have been broken down using chemical or enzymatic treatment. Research shows that the elastin's and collagen's excellent properties are due to their combination of the amino acids glycine, valine, proline and hydroxyproline.

A treatment with MESO STRETCH MARK REMOVER makes it easier for the body to absorb the hydrolysed collagen. Hydrolysed collagen consists of water-soluble signaling agents, peptides that are rich sources of the amino acids glycine, L-proline and L-hydroxyproline. The process stimulates wound healing, strengthens tissue production and helps build the collagen matrix.

MESO STRETCH MARK REMOVER

stimulates wound healing and tissue regeneration

Remove stretch marks with MESO STRETCH MARK REMOVER

Regenerates the skin and removes stretch marks (both white and red).

Both men and women can experience stretch marks on different parts of their body. Stretch marks occur when the skin is stretched or contracted too quickly, such as during pregnancy, weight increase, weight loss or muscle building.

Overloading the skin damages the subdermal collagen, as does damage and dehydration of the elastin fiber matrix. This can leave visible marks or scars that we know as stretch marks. A treatment with MESO STRETCH MARK REMOVER can prevent and remove stretch marks.

MESO STRETCH MARK REMOVER contains active ingredients that, according to clinical studies, can prevent and remove stretch marks by increasing the collagen and elastin formation, firm the collagen matrix and hydrate certain areas of the skin

Stimulates the skin's collagen production

The protein collagen comprises approx. 25% of the protein composition in the human body, and it is collagen that gives our skin a healthy and firm appearance by creating elasticity and replacing dead skin cells.

The skin's collagen production slows with age, and this affects the skin's resilience, causes skin to sag, and leads to the development of fine lines around the eyes and wrinkles between the brows. The MESO STRETCH MARK REMOVER treatment removes stretch marks by stimulating the skin's own regeneration and increasing collagen production.

MESO STRETCH MARK REMOVER uses the skin's own regeneration to remove stretch marks

MESO STRETCH MARK REMOVER rejuvenates the skin from within and is therefore effective at both preventing and removing stretch marks.

The treatment optimises elastin and collagen production by ensuring the proteins' permanent bioavailability. Through the effect of lysyl oxidase enzymes, the network between the fibers is increased and the silicium helps the structure and gather the fibers in a well-organised three-dimensional network.

Chondroitin sulphate is an important glycosaminoglycan, and although it occurs only in small quantities in the extracellular matrix, it still has a significant impact on the condition of the skin. Chondroitin sulphate is essential for the two-part process where the skin's hydration is maintained while hyaluronic acid is increased. Hyaluronic acid binds water in the skin and helps plump it up, giving it a fresh, healthy appearance.

Active ingredients (15)

Aqua distil, Aqua mar, Isot, Sodium Chondroitin Sulphate, Hydrolysed Collagen, Sodium Mannuronate Methyl Silanol, Glucosamine Sulphate, Sodium Metabisulfite. Collagen is a protein that comprises approx. 25% of protein in the human body. Collagen is present in normal skin. It replaces dead skin cells with new ones. As we age, our collagen supply is reduced or broken down. This leads us to developing laughter lines, normal wrinkles and other folds in the skin. Hydrolysed collagen, HCP (also known as pure gelatine and collagen hydrolysate) is collagen that has been enzymatically or chemically processed to make it easier for the body to absorb. Collagen is the main structural protein found in the body's connective tissue. Hydrolysed collagen consists of water-soluble peptides, which are rich sources of the amino acids glycine, L-proline and L-hydroxyproline.

MESO STRETCH MARK REMOVER

stimulates wound healing
and tissue regeneration

Main treatment areas

- Body
- Used on stretch marks and surrounding areas.

This treatment benefits

- Significantly reduces white and red stretch marks
- There are no known side effects to taking hydrolysed collagen protein.

TREATMENT FREQUENCY / TIP

- Once every 10 days x 10
- Ideal for preventing stretch marks during pregnancy or weight loss

Remove stretch marks effectively without side effects

As well as removing and preventing stretch marks, MESO STRETCH MARK REMOVER is proved to have anti-inflammatory properties, and the treatment also reduces redness by 13%.

The treatment is effective but also gentle, with no serious negative side effects linked to the use of the hydrolysed collagen protein.

Contents:

- 10 x 5 ml vials
- 10 x transparent pipettes
- For 10 treatments

Item no.:

MST103

MESO SKIN PERFECTOR

Revolutionary BB Glow Product

MESO SKIN PERFECTOR® a revolutionary, hydrating treatment that instantly makes the skin more radiant and gives it the desired glow. The non-invasive product improves skin tone and helps to correct unevenness, small wrinkles, freckles, dark circles under eyes, age spots, enlarged pores and in some cases, even melasma.

It is a concealer that can reduce discolouration on the face and provide a more even complexion.

MESO SKIN PERFECTOR® treats small blemishes, skin ageing, wrinkles, dull complexion, large pores, dark circles under eyes, scars and impurities.

MESO SKIN PERFECTOR® cocktails have an anti-ageing effect and are designed to brighten the face, make it more radiant and soften wrinkles.

MESO SKIN PERFECTOR® treatments can help reduce pigment spots and brighten the skin. They also mask unevenness in impurities and discolouration caused by light exposure (age spots).

MESO SKIN PERFECTOR® not only ensures more even skin tone, but is also a strong anti-ageing product. It acts as an antioxidant and therefore helps dry skin showing signs of ageing that also has a lack of elasticity.

After about 4-5 treatments the results are long-lasting, even for up to 4 months. Suitable for ALL skin types!

MESO SKIN PERFECTOR® LIGHT

Recommended for people with a very light skin tone/complexion. This skin perfector is used to reduce freckles and colour changes caused by impurities and ageing.

Use this shade like a highlighter for a BB GLOW Meso Contour treatment.

MESO SKIN PERFECTOR® NATURAL

A medium beige tone with pink undertones, ideal for people with a warm skin tone/complexion.

Use this shade to smooth and accentuate a balanced skin tone in pale skin that tends to appear discoloured.

MESO SKIN PERFECTOR® MEDIUM

Ideal for tanned skin or people with a more bronzed-coloured skin tone.

We recommend it for people with a rather dark complexion. This shade is a darker contour for a Meso Contour face treatment.

MESO SKIN PERFECTOR®

Revolutionary BB Glow Product

Main treatment areas

- Face
- Neck
- Décolleté
- Hands

This treatment benefits

- Smooth, radiant complexion
- Glow effect
- Softens fine lines and wrinkles
- Makes skin more radiant and provides long-lasting moisture
- Effect of a BB cream
- Anti-ageing and lifting effects
- Pores are reduced
- Skin-tightening
- Use of detoxifying ingredients (detox effect)
- Immediate and gradual lightening effect
- Suitable for all skin types (also suitable for Asian and Caucasian types)
- Uniform skin tone
- Promotes the production of collagen
- Neutralises free radicals
- Reduces changes to skin tone
- Lightens scars and impurities
- Conceals dark circles under the eyes with its brightening effect

TIP

- Either use one shade over the whole treatment area or combine different shades.

Contents:

- 5 x 6 ml vials
- 5 x transparent pipettes
- for 5 treatments

MESO PEEL KITS

Perfection in skin rejuvenation - against signs of skin damage

Explanation for the ingredients used in MESO PEEL Acne and MESO PEEL Melanin

PYRUVIC ACID 20% | Function: Active ingredient

Note: contain melanin as an active ingredient in MESO PEEL Acne and MESO PEEL.

20% of pyruvic acid is very effective in reducing melasma and skin discoloration after inflammation. It plays an important role in the depigmentation and is active against keratinocytes.

It also has antibacterial, anti-inflammatory and sebum-regulating properties. Pyruvic acid is an effective chelating copper compound that strengthens the tyrosinase enzymes and has a depigmenting effect.

SALICYLIC ACID (20%) | Function: Active ingredient

Note: contained as an active ingredient in MESO PEEL Acne.

Salicylic acid is a slightly hydrophilic acid that has sebum-regulating properties.

It also has anti-inflammatory, antimicrobial, astringent and anti-skin ageing properties.

Resorcinol is a phenolic derivative with keratolytic and regenerative properties, it combats skin discoloration and has a brightening effect. Resorcinol is used in acne and skin treatment to remove hard, scaly or rough skin. It has keratoplastic, antiseptic and slightly caustic properties.

Resorcinol works by breaking down rough, scaly or hardened skin. Resorcinol also disinfects the skin to fight against infections.

RESORCINOL 10% | Function: Active ingredient

Note: contained as an active ingredient in MESO PEEL Melanin

PHYTIC ACID 6%

Phytic acid is a powerful chelating compound with copper that stimulates tyrosinase enzymes and has a depigmenting effect.

Active ingredients

MESO PEEL Protector

- CERA ALBA

MESO PEEL Stop

- BISABOLOL*: (2-6%)
Aloe Barbadosensis Leaf Juice (-> has a calming and cooling effect)
- SODIUM BICARBONATE

MESO PEEL Acne

- PYRUVIC ACID (20%)
- SALICYLIC ACID (20%)

MESO PEEL Melanin

- PYRUVIC ACID (20%)
- RESORCINOL (10%)
- PHYTIC ACID (6%)

MESO PEEL ACNE

Perfection in skin rejuvenation

Benefits of the treatment:

- reduces melasma and skin discoloration after inflammation
- inhibits keratinocytes
- antibacterial, anti-inflammatory and sebum-regulating properties
- fights skin discoloration
- has a brightening effect

MESO PEEL MELANIN

against signs of skin damage due to light and skin discoloration

Benefits of the treatment:

- reduces melasma and skin discoloration after inflammation
- inhibits keratinocytes
- antibacterial, anti-inflammatory and sebum-regulating properties
- reduces hard, scaly or rough skin
- disinfects the skin to fight against infections

Content Meso Peel Kit:

- 1 x 10 ml MESO PEEL Protector
- 1 x 50 ml MESO PEEL Acne or Melanin (pH 3.5)
- 1 x 25 ml MESO PEEL Stop (pH 8.6)
- For 25-30 treatments

MESO PURE PEEL

different actions in one treatment

MESO PURE PEEL

MESO PURE PEEL is the unique peel available in disposable dispensers of 3 ml sachets with natural ingredients that reduce peeling side effects.

MESO PURE PEEL is an excellent product for natural and effective peeling. Perfect for a deep corneolysis cleanse before any treatment.

MESO PURE PEEL is a concentrate of five vegetal extracts:

- blueberries
- sugar cane
- sugar maple
- orange
- lemon

MESO PURE PEEL Five treatments in one:

- Keratolytic
- Collagen synthesis
- Elastin synthesis
- Moisturising
- Smoothing

No redness or discomfort.

MESO PURE PEEL meets the standards for organics and organic cosmetics according to ECOCERT (www.ecocert.com). Alpha hydroxy acids have been shown to promote smoother and younger skin by increasing cell renewal.

Active ingredients (21)

Lactic Acid 28-32 % – highly moisturising, Glycolic Acid 12-17 % – effective keratolytic effect, Citric Acid 2-6 % – stimulates collagen synthesis, Malic Acid 1 % max. increases skin's elasticity, Tartaric Acid 1 % max. enhances skin's firmness.

Peeling

The first one in monouse wipe

MESO PURE PEEL

different actions in one treatment

Main treatment areas

- Face. Must be added before every other dermatological treatment: photo therapy, laser needling, RF and other cosmetic methods
- Body

This treatment benefits

- Cleanse with a powerful corneolysis effect
- Promotes cell renewal. Maximum efficacy with minimum irritation, promotes skin glowing
- Anti-ageing
- Deep corneolysis
- Makes skin receptive to active ingredients

TREATMENT / TIP

- Rub evenly in circular motion on the treatment area until absorbed. Do not rinse for the next 8-12 hours.
- Can be used as a course of treatment for 14 days before bedtime, under night cream
- Can be used before a holiday in the sun to prepare the skin for even melanin production

Contents:

Dispenser with 24 x 3,5 ml disposable sachets

MESO ANTI-AGE MASK

professional Patch Hydrogel face mask

MESO ANTI-AGE MASK

mesoskinline's MESO ANTI-AGEING MASK comprises two layers: The first layer is made of a thick cellulose, while the second is a hydrogel.

Both have an effective osmotic process that enables a high transfer efficiency of active ingredients (pharmaceutical quality) in the hydrogel film.

To create the ideal conditions for stimulating the osmotic process, the skin needs a precise compression through a thick connection, which must be both flexible and elastic to snugly fit the shape of the area that is being treated (for this reason tnt is not the best material for stimulating the osmotic process).

This is the biggest difference between professional masks and homecare masks.

The mask increases the skin's regeneration capacity due to the high percentage of hyaluronic acid, which has an instant softening effect.

Active ingredients

Acetyl Hexapeptide-8 Argireline®, HA 25 %, Resveratrol, Hexyl cinnamal, Aqua (Water), Algin, Polyvinyl Alcohol, Cellulose Gum, Propylene Glycol, Sodium Hyaluronate, Retinyl Palmitate, Perfume, Phenoxyethanol, Methylparaben, Ethylparaben, Propylparaben, Butylphenyl Methylpropional, Alpha-Methyl ionone, Benzyl salicylate, Coumarin, Eugenol, Geraniol.

The MESO ANTI-AGE MASK contains an innovative formula of natural ingredients. The main ingredients are: Acetyl Hexapeptid-8 Argireline®, HA 25 %, Retinol and Resveratrol.

The MESO ANTI-AGEING MASK reduces the depth of facial wrinkles caused by muscle contraction during different facial expressions, especially around the eyes, mouth and brow.

It detoxes the skin and has excellent antioxidant properties (vitamins A, C and E). Due to the high percentage of hyaluronic acid, the physiological hydrolipid level is reconstructed from first application.

MESO ANTI-AGE MASK

Professional Patch
Hydrogel face mask

Main treatment areas

- Face
- Neck

This treatment benefits

- Anti-ageing
- Post mesotherapy
- Post laser treatment
- Post peeling
- Firming effect
- Reduces wrinkles around the eyes, mouth and brow
- Moisturising
- Firmness
- Skin Radiance

TREATMENT

- Place the mask on the face and neck after treatments, for up to 40 minutes.

Contents:

Box with 10 masks

Item no.:

MST107

Active ingredients

PF 50+, Syn[®]-ake, Hyaluronic acid, Oat, Aloe.

SYN[®]-AKE

SYN[®]-AKE is based on a patented mechanism. It copies the sequence of the essential amino acids in connection with the Waglerin-1-function. SYN[®]-AKE's safety and activity has been thoroughly tested.

Its effect focuses on an immediate and long-lasting relaxation of wrinkles by blocking the neuro transmission in the nicotinic acetylcholine receptor. The peptide is an antagonist to the membrane of muscular nicotinic acetylcholine receptors (mnAChR). As the muscular nicotinic ACH receptor is blocked, the ion channel remains closed. There is no absorption of Na⁺ and the muscle cells remain relaxed. The transmission of nerve impulses to the muscles is inhibited and the facial muscles are relaxed.

The efficacy of the SYN[®]-AKE tripeptide has been demonstrated in vitro by measuring the rate of contraction of the affected muscle cells as a function during the incubation period.

MESO LIFT AND PROTECT

very high sun protection with anti-age effect

Day cream with incredibly high sun protection and anti-age effect

The tolerance and efficiency of MESO LIFT AND PROTECT has been tested under dermatological conditions.

MESO LIFT AND PROTECT is a multifunctional product. As well as being an effective sun protection against UVB and UVA rays, the formula is also enriched with valuable active ingredients that guarantee:

- Protection against UV rays
- Moisturising
- Soothing
- ALOE VERA

The famous Aloe Vera or Aloe barbadensis is scientifically tested on all types of burns, whether from radiation, thermic burns or the sun. It has also proven to have a preventative effect when applied before, during and after skin damage.

Many of the benefits of AV come from the polysaccharides found in the gel from the leaves. But several other natural chemical substances in Aloe Vera extract are associated with beneficial health-promoting effects: Amino acids, anthraquinones, enzymes, organic and inorganic substances, fats, carbohydrates, lignin, salicylic acid, saponins, sterols and vitamins (B1, B2, B6, C, B-carotene, choline, folic acid and B-tocopherol).

HA low molecular weight (5-10 kDa)

Hyaluronic acid and the more general mucopolysaccharides are among the primary components of connective tissue structures. Hyaluronic acid's incredibly low molecular weight (5-10 kDa) in MESO LIFT AND PROTECT improves intracutaneous penetration and forms a new raw material for the formation of a medium molecular weight of hyaluronic acid.

This form of hyaluronic acid is especially suitable for retaining water both in the connective tissue and in the deeper layer of the skin (and is therefore responsible for profound hydration). In the upper layers of the skin, the transepidermal water loss (TEWL) is reduced.

COLLOIDAL OATMEAL

Colloidal oatmeal has been used for thousands of years to treat skin ailments. Colloidal oatmeal is popular for its moisturising, cleansing, antioxidant and anti-inflammatory properties, thanks to its chemical heterogeneity.

It has been proven that oatmeal extract inhibits activity of the nuclear factor Kappa B (NF-kappa B) in keratinocytes and the release of pro-inflammatory histamine of cytokines.

It also produces arachidonic acid, the cytosolic phospholipase A2 and tumor necrosis factor alpha (TNF-alpha). Colloidal oatmeal has proven to be a safe and effective ingredient in various products for personal care. It contains a number of active ingredients, including polysaccharides, proteins, lipids, saponins, enzymes, flavonoids, vitamins and avenanthramides (polyphenols).

A total of 47 people took part in the study of the clinical efficacy of a body cream that contained oatmeal. This study showed that the skin's moisture was at all times significantly higher, even two weeks after stopping use of the cream, compared to the baseline.

The surface area with dead epithelial cells and the epithelial scaling index on the lower arm were significantly reduced at all times during the study, compared to the baseline.

MESO LIFT AND PROTECT

anti-age day cream with very high sun protection

Main treatment areas

- Face
- Body
- Hands

Meso Lift and Protect benefits

- Sun block with three effects
- Anti-ageing
- Protection against UVB and UVA rays
- Moisturising
- Soothing
- Wrinkle reduction
- ALOE VERA (calming effect)

Application

MESO LIFT AND PROTECT is a day cream with incredibly high sun protection and anti-age effect. It is ideal for sensitive skin, photodermatoses (sun allergy), light sensitivity caused by some medications, pigmentation spots, premature ageing and immunological changes.

Helps prevent dermatological ailments as a result of extreme exposure to UVB and UVA rays (SPF 50+), including sun allergy, spots, elastose, premature ageing and the consequences from the accumulative effects of radiation on the skin.

MESO PIGMENT REDUCE

Optic effect

Melanogenesis and sick skin complexion

The skin's complexion is the result of the presence of various pigments. Haemoglobin in the red blood cells and carotene found mainly in the adipocytes.

The pigment that most affects the skin's complexion is melanin, which is produced by specialised cells in the epidermis called melanocytes. Melanin regulates the skin's complexion via a complex mechanism.

A sickly complexion is caused by changes in the skin's colour from too much melanin or, in some cases, deposits of other pigments in the epidermis. This change may occur on specific areas of the body or may be more widespread.

Discolouration or patches on the skin are not all the same. Each one has a different origin and depth.

What are the key ingredients in MESO PIGMENT REDUCE?

Glabridin: An isoflavanoid extracted and isolated from the *Glycyrrhiza glabra* root. Vitro and vivo studies have shown that this phytoestrogen contains a number of properties: Antioxidant, anti-inflammatory, neuroprotective, antiteratogenic, antibacterial and depigmenting when applied to the skin. The depigmentation activity of the glabridin is caused by a multifunctional effect on the causes that lead to the manifestation of a sick complexion.

Vitamin C: Ascorbic acid, an almost ubiquitous molecule of nature, is present in many citrus fruits and leafy greens and reduces melanin production as it is able to reduce o-DOPACHINON to its previous state, DOPA, which disrupts the oxidation process that leads to the formation of melanin. This proves to be more stable in relation to oxidation and thereby improves the product's effect.

Arbutin: A natural glucoside of Hydroquinone, chemically known as Hydroquinone-B-D-Glucopyranoside. However, the mechanism of action appears to be different; clinical studies on the cultivation of human melanocytes have opened up the possibility that it does not react to a synthesis or enzyme expression. Clinical studies have confirmed that its application does not cause side effects, unlike hydroquinones.

Kojic acid: Inhibits the enzyme tyrosinase, chelates copper in the active area. Clinical studies have shown that Kojic acid and its esters have depigmenting properties and are considered safe and non-toxic. The inhibiting effect of melanin formation is due both to the inhibiting activity of the transcription factor associated with microphthalmia (MITF), and the inhibition of the hormone-stimulating alpha-melanocyte activity (alpha-MSH)

Azelaic acid: The bleaching properties of azelaic acid are due to the effect of the competitive tyrosine-inhibiting effect.

Niacinamide: The biologically active amid of vitamin B3. Studies have shown that niacinamide combined with suitable sun protection can provide better lucidity compared with the use of sun protection on its own.

Vitamin A: A retinoic acid that also acts as depigmenting and can give a luminous effect when applied to the skin. However, the mechanism of action, which has not been fully clarified, is on the one side associated with increased cell replacement of keratinocytes, thus facilitating pigment loss from the epidermis. On the other, it indirectly enhances the cytotoxic effect on melanocytes in some skin pigmentations by inhibiting the routes of discharge (with a relative increase in toxic substances such as quinones).

Kudzu: The root and flower, which is used in traditional medicine, has various medical properties. Numerous studies show the activity of this plant extract in relation to Melanogenesis. The activity in relation to suppressing the Melanogenesis is confirmed visually by colour of the fontana-masson.

Brassica Napus Seed Extract: Rich in antioxidants. In vitro and in vivo studies have shown that the active ingredient is able to react to signs of ageing, reduce discolouration of the skin and ensure an even complexion.

MESO PIGMENT REDUCE

Optic effect

Main treatment areas

- Face
- Body
- Hands

Meso Pigment Reduce benefits

MESO PIGMENT REDUCE's formula is rich in active ingredients and contains high concentrations and powerful depigmentation properties. These form a contrast to the phenomenon, both of a biological and chemical-physical nature, which lies at the root of these skin imperfections.

- Rapid bleaching effect
- Hyper pigmentations
- Ageing spots
- Dark circles under the eyes

Application

Apply the product twice daily directly to the relevant area. The product starts working after just a couple of applications.

MESO PAIN REDUCE

desensitising the skin

MESO PAIN REDUCE

MESO PAIN REDUCE is a desensitisation agent for topical application based on Eugenol, specially derived from clove oil, which has antiseptic and antibacterial properties and, more importantly, anaesthetic properties.

MESO PAIN REDUCE is used as a topical anaesthetic before aesthetic treatments such as fillers, mesotherapy, laser, needling and other treatments that can be painful for the patient.

Its composition provides a local topical sensory shock with immediate effect, which works for around ten minutes, enough time to perform the treatment. The fast-acting effect means that it can be re-applied as needed, so the treatment can continue without disruption.

Side effects

None reported.

Active ingredients

Eugenol (specially extracted from clove oil), Camphor, Capsaicin.

Does not contain Lidocaine, Tetracaine, Adrenalin

MESO PAIN REDUCE

desensitising the skin

Main treatment areas

- Face
- Body

Application

- Anti-bacterial action
- Pain relieving/anaesthetising
- Through the special nozzle, apply one or more strips of approx. 1 cm (out over the treatment area) with a damp cloth. Massage gently. Do not rinse until after the treatment.

Meso 3D EYE CREAM

Intensive treatment for the eye contour

MESO 3D EYE CREAM is an intensive treatment for the eye contour. It re-compacts and lifts the upper eyelid, smooths and lightens the periocular area, restructures and makes the eye contour more toned and compact.

Its specific formulation acts on the main causes of bags and dark circles, stimulating the cutaneous micro-circulation, promoting the elimination of blood-derived pigments and helping to prevent the signs of periocular ageing.

Meso 3D Eye Cream contains a compilation of active ingredients consisting of triterpene saponins - (Escin) of Aesculus Hippocastanum and lecithin, enriched with an anti-bags' and anti-dark circles' plant complex based on silk tree extract.

These ingredients work in concert to activate the periocular microcirculation and assist in the reabsorption of hemoderivative pigments responsible for dark circle colouring.

Furthermore, this formulation is able to improve the roughness and periocular skin tone, stimulating the regeneration of the structural components and thus restoring a renewed and luminous look.

It gives light and vitality to the eye contour, reduces oxidation and activates

MAIN INGREDIENTS

ESCIN

Complex of triterpene saponins (escin) of Aesculus Hippocastanum and lecithin, with soothing, anti-eudermic and venotonic properties.

It helps venous blood circulation, improves capillary tone, reduces capillary permeability and, therefore, the fragility of the veins.

It drains and deflates the action of the bags and stimulates the microcirculation to relieve the signs of dark circles.

Albizia Julibrissin extract (silk tree) and Darutoside:

Protects, strengthens and improves the properties of the dermis.

By consolidating the microvascular network and stimulating the detoxifying system, it reduces the permeability of the capillaries and the accumulation of glycotoxic pigments responsible for the heterogeneous colouring and the tired appearance, giving a lifting effect on the sagging of the upper eyelids.

Hyaluronic Acid:

Thanks to its extraordinary ability to incorporate and retain large amounts of water in the intercellular spaces, it is essential for perfect hydration of skin tissues.

It is also precious because it acts both on the surface by lifting the epidermis and more deeply by stimulating the cellular metabolism of the skin tissues. In this way, it fights skin ageing and the formation of wrinkles, keeping the skin compact, elastic and smooth.

MESO 3D EYE CREAM

Intensive treatment for the eye contour

Benefits

- The skin is moisturized and elastic
- Helps to reduce expression lines in the eye area
- Reduces bags and dark circles
- Stimulates collagen synthesis
- Gives instant smoothing action

Ingredients:

- Aqua
- Glycerin
- Propylene Glycol, Lecithin
- Sodium Polyacrylate CI77891
- Phenoxyethanol
- Albizia Julibrissin Bark xtract
- Centella Asiatica Extract
- Aesculus Hippocastanum Seed Extract
- Tocopheryl Acetate
- Darutoside
- Hyaluronic Acid
- Diglycerin
- Escin
- Panthenol
- Ethylhexylglycerin
- Triethoxycaprylsilane
- Pinus Pinaster Extract

MESO BALANCING CLEANSER

Ideal for removing all traces of makeup

MESO BALANCING CLEANSER

is a balancing make-up remover gel that gently removes impurities from the skin. It acts in depth by gently cleansing without drying or irritation, leaving the skin exceptionally radiant, moisturised and velvety.

Its formula, enriched with vegetable oils chosen for their very high fatty acids content, nourishes the skin in depth, improving elasticity and smoothness, reducing redness. Particularly suitable for sensitive skin it is ideal for removing all traces of make-up from the face and eyes without burning.

Used daily, it guarantees the physiological hydration of the skin, giving an immediate sensation of comfort.

MAIN INGREDIENTS

Sweet Almond Oil:

it has one of the highest percentages of unsaturated and polyunsaturated fats, which determine its emollient and nutrient properties useful for the skin.

Thanks to its eudermic properties, it maintains the natural hydro-lipidic balance, contributing to tissue cell renewal.

Linseed Oil:

Rich in essential fatty acids of the Omega 3, 6 and 9 group, the so-called „good fats“, it is considered an excellent anti-ageing agent.

The linoleic acid it contains has an elasticizing action and helps the skin to regain moisture and softness. It nourishes the skin and promotes the oxygenation of the cells and their natural renewal, carrying out an anti-oxidant action.

Borage Seed Oil:

Borage Seed Oil is the most abundant vegetable source of gamma-linolenic acid, a polyunsaturated fatty acid that is very useful for keeping skin elastic, puffed-up and young.

This oil moisturizes the skin, fights skin ageing and increases the protective capacity of the skin, performing a ,regenerative action, while fighting skin inflammation.

Olive Oil:

Obtained from the pulp of the olive fruits, it is a powerful antioxidant. It protects against the harmful action of free radicals and prevents the effects of ageing.

It is a rich emollient oil that deeply nourishes the skin and regulates its natural hydration system. It also has a soothing effect on redness and irritation and is well tolerated even by the most sensitive skin.

MESO BALANCING CLEANSER

Ideal for removing all traces of
makeup

Benefits

- Refreshing Cleanser
- Makeup Remover
- Toner

Ingredients:

- Aqua
- Glycerin
- PEG-40 Hydrogenated Castor Oil
- Disodium Cocoamphodiacetate
- Acrylates/C10-30 Alkyl Acrylate Crosspolymer
- Olea Europea (Olive) Fruit Oil
- Prunus Amygdalus Dulcis (Sweet Almond) Oil
- Linum Usitatissimum (Linseed) Seed Oil,
- Sodium Chloride
- Sodium Lauroyl Sarcosinate
- Cocamidopropyl Betaine
- Ammonium Lauryl Sulfate
- Borago Officinalis Seed Oil
- Potassium Sorbate
- Sodium Benzoate
- Parfum, Disodium EDTA
- Tocopherol
- Sodium Hydroxide
- CI 42051
- CI 44090.

MST132

MESO RETINOL DREAM

Restores skin volume and texture and remodels the face

MESO RETINOL CREAM

is a cream formulated with a complexity of high-performance ingredients that help rectify and prevent the main signs of ageing.

It has a synergistic action on the skin's surface and at depth thanks to the combined effect of active ingredients such as retinol, alpha lipoic acid and a highly effective antioxidant vitamin complex that acts against wrinkles and skin relaxation.

It helps to reduce the appearance of fine and marked wrinkles. It also helps to minimise the visibility of spots and pores, giving a brighter complexion. It works in depth by nourishing the skin. It gives tone, vitality and renewed elasticity thanks to the synergy of active plant extracts and molecules that can support the epidermis in its self-regeneration processes.

MAIN INGREDIENTS

Retinol:

One of the forms of Vitamin A, is a highly effective and multifunctional anti-ageing product:

it stimulates the elasticity and tone of the skin, reduces wrinkles, and promotes cell turnover, the natural renewal cycle of the skin.

It stimulates the production of collagen and elastin, restoring density and texture to the skin and reshaping the face, which acquires a rejuvenated appearance.

Lipoic Acid:

An active antioxidant, adjuvant in the treatment of skin ageing,

Lipoic acid has a scavenger activity and takes part in various antioxidant mechanisms of the body, such as the regeneration of Vitamins C and E, and CoQ10.

Acmella Oleracea extract:

The product is known for its natural botulinum-like abilities, and for this reason it is considered highly effective in anti-ageing treatments and for the reduction of wrinkles.

It is used specifically for expression lines. Its action is preventative and soothing.

Vitamin E:

Thanks to its free-radical scavenging activity, it protects the skin from external factors (pollution, UV-A UV-B) that can be dangerous for the skin and cause premature ageing.

MESO RETINOL DREAM

Restores skin volume and texture
and remodels the face

Benefits:

- Anti-ageing, reduces the appearance of wrinkles
- Improves the skin's texture and connective tissue
- Powerful anti-radical activity
- Improves skin tone and firmness
- Makes the skin smoother with a younger appearance
- Reduces skin blemishes and gives a more even complexion

Ingredients:

- Aqua
- Cetearyl Alcohol
- Caprylic / Capric Triglyceride,
- Glycerin
- Butyrospermum Parkii Butter
- Aloe Barbadosensis Leaf Juice
- Propylene Glycol, Dicaprylyl Ether
- Dimethicone
- Glyceryl Stearate
- Phenoxyethanol
- Olea Europea (Olive) Fruit Oil
- Prunus Amygdalus Dulcis (Sweet Almond) Oil
- Linum Usitatissimum (Linseed) Seed Oil
- Potassium Palmitoyl Hydrolyzed Wheat Protein
- Acmella Oleracea Extract
- Hioctic Acid
- Tocopheryl Acetate
- Diglycerin
- Borago Officinalis Seed Oil
- Retinyl Palmitate
- Ethylhexylglycerin
- Disodium EDTA
- Parfum
- Pinus Pinaster Extract
- vTocopherol
- Triethanolamine
- Potassium Sorbate
- Sodium Benzoate • BHA, BHT

MESOpower® pen MP-5000

The latest skin therapy system!

MESOpower® pen Wired & Wireless 2 IN 1

Designed by mesoskinline in Denmark

- Needle length 0.25mm - 1.0mm
- Hits per minute 18000 RMP (up to 300 hits per second)
- Two lithium batteries (working time 6 hours when fully charged)

3D Innovation

MESOpower® pen is a specially developed professional mesotherapy handpiece with ergonomic design. It adjusts to fit multiple users, has real-time energy visualisation, and dual innovative technology with Smart Memory to meet your usage characteristics.

MESOpower® pen is perfect for a range of anti-age treatments, where serums/ mesococktails are applied with the help of gentle pressure movements and vibration. These include:

- Non-Invasive Mesotherapy
- Microneedling
- Microlifting

Wireless and Handy

This professional handpiece can also be used wirelessly, which is a noticeable advantage for all therapists worldwide. Transport your equipment in a stylish aluminium suitcase to any location you choose to perform the treatment - clinic, spa center, exhibition.

Do you perform many treatments per day? Don't worry - the battery can be charged while working. Once the battery is fully charged (Max. 2 hours), it could be used up to 6 hours continuously.

Safe and efficient

Regardless of the country, MESOpower® pen meets all regulations and requirements of needle length. Which means that it is safe to use on the face and body, where you can adjust the needle length from 0.25mm to 1,0mm according to the areas and purpose of the therapy.

The needle module is a perfect size and convenient in the treatment of narrow areas such as nose, eye-area or mouth-area.

In order to perform a comfortable and suitable treatment for any skintype, skin thickness or skin sensitivity, the vibration speed can be controlled in 6 levels. Its speed can be adjusted 100 - 300 hits/second.

Every needlemodule is sterile and individually packed. The needles in the module are covered with a removable plastic protection lid, so you avoid contamination risk while unpacking or when disposal of the needlemodule.

3D individual Drive

MESOpower® pen consists of 3 individual drive systems. which provide 3 times protection for core components, prevents any contamination of the equipment, prevents overheating the handpiece and keeps the perfect vibration level.

MESOpower® pen Technology

The MESOpower® pen is the very latest development from the group of various Microneedling pens worldwide.

The technology has evolved and replaces the use of needle rollers, which are cylindrical tools with small needles over the surface, and rolled on the skin to cause micro damage. There are other, similar products on the market, including the SkinPen or Dermapen, but all are based on the same concept - to perform controlled and even skin damage in order to stimulate skin renewal.

MESOpower® pen can even treat highly delicate areas, which are not possible to treat with a needle roller. When performing anti-age treatment with MESOpower® pen, hold it vertically against the skin, and adjust the depth and speed of needles on the device according to the area and skintype being treated.

MESOpower® pen MP-5000

The latest skin therapy system!

Specifications

- Electric MESOpower® pen with sterile single-use needlemodules
- Ergonomic Design and CE marked
- Needle length: From 0.25mm to 1.0mm
- Needle number: 3/11/24/36 needles per module
- Adapter: 5v,1000mA
- Speed: Max. 300 hits/second
- Includes two rechargeable lithium batteries, charger, pen holder and a portable aluminium case and 40 needle modules

Features

- Automatic speed regulation by single click (100 - 300 hits/second)
- Various needlemodules to stimulate skin: for treating fine lines, scars or large areas
- Vibration and mild microneedling creates perfect biostimulation of the skin, so it absorbs anti-age products immediately while treated and without major trauma.
- No downtime or bruising.
- More than 50% of stretch marks and acne scar improvement.
- No lidocaine anesthetic needed .
- Non-traumatic treatment makes it possible to perform each individual treatment just 10-14 days apart.

Warranty

- 1 years warranty.

Contents:

- 1 x MESOpower pen MP-5000
 - 2 x Rechargeable battery modules
 - 1 x Adapter for wired connection
 - 1 x Power Cable
 - 1 x Table Pen Holder for MESOpower Pen MP-5000
 - 1 x User Manual English
 - 10 x 3-Point Microneedling Needle Modules, Sterile
 - 10 x 11-Point Microneedling Needle Modules, Sterile
 - 10 x 36-Point Microneedling Needle Modules, Sterile
 - 10 x 24-Point Microlifting Plastic Modules, Sterile
- All packed in a stylish portable aluminium suitcase

Item no.: MST2000

MESO 3-Point Nano Module

(For MESOpower® pen) Item No: MST3001

Product description (1 box):

- 10 individually packed needle modules
- Sterile and single use only
- Ultrathin 0.18 mm
- Stainless titanium steel
- Sterilised with gamma rays and disposable
- Production date, Expiry date and LOT number on each needle
- Length of the needles is adjustable (0,25 mm-1 mm)

Via micro perforations in the skin, micro-needles insert the active anti-ageing ingredients (mesoskinline meso-cocktails) creating natural and almost painless cell renewal.

Cell renewal following a microneedling meso treatment leaves the skin tighter, improves its appearance and reduces wrinkles and minor imperfections.

A special Meso-microneedling 3- point module for precise treatment of deep lines and mimic wrinkles.

The innovative 3-Point - Microneedling Module is most advanced clinical microneedling unit on the market. With this state of the art module, you can stimulate, open the top layer of the skin. Use it together with suitable mesoskinline cocktails or similar products.

The module consists of three safe micro-needles, which stimulate the top layer of the skin (epidermis) in a mild and effective manner and also easy access to difficult areas due to its small size and tilting needle plate.

Double effect with MESO 3-Point Nano Module

The needles create invisible microscopic holes, which activate the skin's own natural healing process, producing more collagen and elastin. This naturally increases the skin's resilience.

Meanwhile, mesoskinline meso-cocktails flow into the skin during treatment and not after the treatment (unlike many other microneedling applications). The skin therefore absorbs all of the vitamins and amino acids from the products optimally, while renewing itself.

This improves the treatment result by approx. 30% and allows optimum absorption of the active ingredients in the right quantities and in the correct skin layers.

As the skin's barrier has been opened to the active anti-ageing ingredients, additional active ingredients from the MESO ANTI-AGE MASK used post-treatment are absorbed more effectively.

MESO 11-Point Micro Module

(For MESOpower® pen) Item No: MST3002

Product description (1 box):

- 10 individually packed needle modules
- Sterile and single use only
- Ultrathin 0.18 mm
- Stainless titanium steel
- Sterilised with gamma rays and disposable
- Production date, Expiry date and LOT number on each needle
- Length of the needles is adjustable (0,25 mm-1 mm)

The microneedles introduce the active anti-aging ingredients (mesoskinline mesococktails) through micro-perforations in the skin and ensure a natural and almost painless cell renewal.

For mimic wrinkles (for thin skin and sensitive areas). A classic round microneedling head for effective skin rejuvenation treatment.

The innovative MESO 11-Point Micro Module is one of the safest and most effective needle modules on the market. The advanced module allows you to stimulate, activate and open the upper layers of the skin. Thanks to the appropriate distance between the needles, the skin is treated correctly – without the risk of scarring.

Use this needle module on mimic wrinkles, stretch marks or acne scars with appropriate mesoskinline cocktails or similar products.

How to use:

Open the sterile safety package and remove the module. Do not touch the needles. Rotate the module into the Meso Power handpiece until secured, then remove the plastic safety cap from the needles.

Hold the „Turn on“ button on the handpiece for 2 seconds to activate it, and adjust the needle length by turning the handpiece. You can change the speed of the needles (push per second) with a single press of the „Turn on“ button.

You are now ready to start the treatment. Treat the skin with perpendicular movements and maintain a 90°-angle that ensures even needle depth and only causes minimal skin lesions.

Caution:

The following areas may not be treated with any type of needles: Open wounds, active acne, irritated skin, eczema, skin cancer, moles!

A safe plastic needle module designed to stimulate blood and lymph circulation and to increase product penetration into the skin by up to 97%.

With the MESO 24-Point Nontraumatic Module, you can effectively treat all areas of the skin with hyaluronic acid or mesoskinline meso-cocktails.

The innovative MESO 24-Point Nontraumatic Module consist of a plastic plate with 24 stimulation points (0,7 mm), which activate the skin's top layer (epidermis) in a mild and effective manner.

This is a special module for non-invasive mesotherapy, used for the face, body and scalp. The 24 stimulation points absorb the active mesoskinline meso-cocktails into the skin, leading to natural cell renewal.

When you run the MESO 24-Point Nontraumatic Module across the skin, you activate the skin's natural healing process. During the healing process, more collagen and elastin forms, making the skin more resilient. This makes the skin more receptive to anti-ageing ingredients added from the different mesoskinline meso-cocktails.

Treating the skin with the MESO 24-Point Nontraumatic Module doesn't require anaesthetic and doesn't cause visible healing or scab formation, hence why there is no risk of scarring or skin damage. Even sensitive skin will tolerate non-invasive Mesotherapy treatment with this module.

The 36-Point module is the largest in the range and suitable modules for treatment of deep wrinkles, stretch marks, surgical and acne scars.

The innovative MESO 36-Point Maxi Module is the most advanced clinical unit on the market. With this state-of-the-art module, you can stimulate, open the top layer of the skin. Use it together with suitable mesoskinline cocktails or similar products.

The module consists of thirty-six safe micro-needles, which stimulate the top layer of the skin (epidermis) in a mild and effective manner and easy access to difficult areas due to its small size.

Action of the Needle module:

Mesoskinline needle modules include modules of all kinds – from the tiny 3-Point Nano Module to the 36-Point Maxi Module.

The number of needles is relative to the problem area to be treated and delivers the most accurate and suitable treatment a therapist can perform.

Very fine Ø 0,18 mm titanium steel needles combining with anti-age meso-cocktail, feed the skin with necessary healthy ingredients and activate the collagen production due to micro-damage of the skin.

It can puncture more than 300,000 micro vessels on the epidermis within five minutes, creating an efficient nutrient delivery system between the epidermis and subcutaneous tissue.

MESO 24-Point Nontraumatic Module (For MESOpower® pen) Item No: MST3003

Product description (1 box):

- 10 individually packed needle modules
- Sterile and single use only
- Specially designed module with 24 x 0,7mm plastic pyramid-shaped stimulation points
- Sterilised with gamma rays and disposable
- Production date, Expiry date and LOT number on each needle
- Length of the needles is adjustable (0,25 mm-0,7 mm)

Cell renewal following non-invasive Mesotherapy treatment results in tighter skin, improvement in the skin's appearance, a reduction in wrinkles and minor imperfections, activation of the blood circulation around the hair follicles following Mesotherapy for hair loss.

MESO 36-Point Maxi Module (For MESOpower® pen) Item No: MST3004

Product description (1 box):

- 10 individually packed needle modules
- Sterile and single use only
- Ultrathin 0,18 mm
- Stainless titanium steel
- Sterilised with gamma rays and disposable
- Production date, Expiry date and LOT number on each needle
- Length of the needles is adjustable (0,25 mm-1 mm)

Via micro perforations in the skin, micro-needles insert the active anti-ageing ingredients (mesoskinline meso-cocktails) creating natural and almost painless cell renewal.

Cell renewal following a microneedling meso treatment leaves the skin tighter, improves its appearance and reduces wrinkles and minor imperfections.

MESO POWER DEVICE MS-3

The power of transformation

MESO POWER DEVICE MS-3 FOR PROFESSIONALS

With the MESO POWER DEVICE MS-3 you can offer professional non-invasive mesotherapy with a high standard of hygiene.

With special attention to design and high-quality materials, the outer casing is made of brushed aluminium. The slim handpiece is attached to the stainless steel clipboard held by two small magnets.

The MESO POWER DEVICE MS-3 is finished to the highest quality. The ergonomically shaped handpiece produces very little noise or vibration and is easy to hold. The modules can be operated at a working speed of 50 to 150 strokes per second.

The device is suitable for use in state-of-the-art for clinical microneedling and non-invasive mesotherapy. The MESO POWER DEVICE MS-3 is manufactured in Germany.

Particular emphasis is placed on quality, precision and performance. In addition, the modules used in conjunction with the equipment are equipped with a patented safety membrane.

MESO POWER DEVICE MS-3 is an affordable device with unlimited benefits:

- Sophisticated and safe clinical microneedling and non-invasive mesotherapy device
- Disposable module with patented safety membrane
- Suitable for the treatment of lighter and darker skin tones (Fitzpatrick I - V)
- Needle length can be adjusted by turning the handpiece
- The handpiece does not reach very high temperatures even after prolonged use.
- No ablation or visible damage to the skin
- Adjustable needle speed. The frequency can be set to 11 levels, from 50-150 NPS (needle lift per second)
- The selected needle frequency is digitally displayed
- Option to connect a second handpiece
- Minimal regeneration time of the skin
- Low risk of PIH (Post Inflammatory Hyperpigmentation)
- Low noise and low vibration
- Manufactured in Germany by MT.DERM

These methods are used widely and successfully for anti-age treatments (wrinkles, hair loss, stretchmarks) and reduction of scars depth. It is proved that the treated skin has very short regeneration phase / downtime after treatments with MESO POWER DEVICE MS-3, which is a great benefit for your client.

CERTIFICATES & REGISTRATION

MT.DERM places great importance on quality and safety. For this reason, the certification of our quality management system is rated very highly.

MESO POWER DEVICE MS-3

The power of transformation

Operating Conditions

- Ambient temperature: +10 °C to +35 °C
- Relative humidity: 30% to 75%
- Width x height x depth: 230 x 45 x 185 mm
- Weight of handpiece: ca 100 g
- Total weight: 1100 g

Technical Parameters

- Type: AD-1.3-MN-MP
- Rated voltage: 15 V – (DC)
- Frequency: 50 Hz
- Power input: 5.7 V A max
- Working frequency: selectable from 50 – 150 hits / second
- Drive: precision DC motor
- Operating mode: continuous operation

Warranty

- 2 years warranty on machine and handpiece.

Contents:

- MESO POWER DEVICE MS-3 unit with LED display
- Meso handpiece
- Foot pedal to control the handpiece
- Handpiece holder
- Instructions in German and English

Item no.: MST201

MESO HANDPIECE

High power results

MESO HANDPIECE

Product information

MESO HANDPIECE is specially developed by MT Derm, for non-invasive mesotherapy and microneedling. The handpiece generates little noise and vibration and fits easily into the hand. Its needles can be operated with a speed from 50 up to 150 hits/second.

Our high quality handpiece has convincing precision and silence. The Safety membrane prevents backflow of the liquids and no risk for contamination of the handpiece.

The variety of icrolifting- and microneedling modules allows you to choose appropriate needle for each treatment. Better results are being achieved due to suitable needle size.

The tilting needle plate adapts to the surface of the skin = less snagging on the skin surface and minimal epidermal trauma. The single needles give higher penetration force and less pain for the patient.

Benefits

Meso Handpiece offers versatile possibilities in the field of non-invasive mesotherapy and microneedling

- Non-invasive mesotherapy treatments and microneedling
- Treatment of acne scar tissue
- Minimal convalescence
- Low risk of PIH
- Treatment of Fitzpatrick I – V
- Low noise and vibration
- Made in Germany

The following needle module fits to MESO HANDPIECE:

- Microneedling module, 6-point needle plate, Adjustable stroke length - 0,3mm - 0,7 mm
- Microlifting Module, 18-point plastic needle plate, Adjustable stroke length - max 0,5 mm.

MESO HANDPIECE

High power results

Compatible:

- MESO POWER DEVICE MS-3
- LaBina PL-500 Control
- LaBina PL-1000 Mobil
- LaBina PL-2000 Premium and other similar devices

Remember to select the correct power cord. If we do not have the one that fits your machine, please contact us.

Warranty:

2 years warranty on handpiece

Contents:

MESO HANDPIECE - specially developed by MT. Derm, for non-invasive mesotherapy and microneedling.

Item no.:

CMN50X1: Handpiece with Firewire Plug

MESO MICROLIFTING MODULE

for non-invasive mesotherapy treatment

Compatible: Meso and other similar Handpiece
MESO POWER DEVICE MS-3

Contents: Package with 8 modules
(18 x 0,5 mm plastic stimulation points)

Item no.: EKNPA361805

ADVANCED and SYMPHONY MICROLIFTING MODULE

for non-invasive mesotherapy treatment

Compatible: ADVANCED and other similar Handpiece
LaBina PL-1000 Mobil / LaBina PL-2000 Premium

Contents: Package with 8 modules
(18 x 0,5 mm plastic stimulation points)

Item no.: E-MM0001

Compatible: SYMPHONY and other similar Handpiece
LaBina PL-500 Control

Contents: Package with 8 modules
(18 x 0,5 mm plastic stimulation points)

Item no.: E-MM0020

With the Microlifting Module, you can treat all areas of the skin effectively with hyaluronic acid and mesoskinline meso-cocktails

The module consist of a plastic plate with 18 stimulation points (0,5 mm), which activate the skin's top layer (epidermis) in a mild and effective manner.

This is a special hygienemodule for non-invasive meso therapy, used for the face, body and scalp.

The 18 stimulation points absorb the active **mesoskinline** meso-cocktails into the skin, leading to natural cell renewal.

Cell renewal following non-invasive mesotherapy treatment results in tighter skin, improvement in the skin's appearance, a reduction in wrinkles and minor imperfections, activation of the blood circulation around the hair follicles following mesotherapy for hair loss.

When you run the module across the skin, you activate the skin's natural healing process.

During the healing process, more collagen and elastin forms, making the skin more resilient.

This makes the skin more receptive to anti-ageing ingredients added from the different **mesoskinline** meso-cocktails.

Treating the skin with the module doesn't require anaesthetic and doesn't cause visible healing or scab formation, hence why there is no risk of scarring or skin damage. Even sensitive skin will tolerate non-invasive mesotherapy treatment with this module.

MESO MICRONEEDLING MODULE

for invasive microneedling treatment

Compatible: Meso and other similar Handpiece
MESO POWER DEVICE MS-3

Contents: Package with 8 modules
(6 x 0,3 mm metall needles)

Item no.: EMNPA360603

Compatible: Meso and other similar Handpiece
MESO POWER DEVICE MS-3

Contents: Package with 8 modules
(6 x 0,7 mm metall needles)

Item no.: EMNPA360607

Meso and Advanced microneedling module

Microneedling module with needle plate 6 x 0,3 mm or 6 x 0.7 mm needles.

- The distance between the needles and skin is adjustable.
- With this state of the art module, you can stimulate, open the top layer of the skin and effectively treat individual parts of the skin.
- Use it together with suitable **mesoskinline** cocktails or similar products.
- The most advanced clinical microneedling unit on the market.
- Sterile disposable needle module with patented safety membrane.
- Suitable for treating all skin colours.

With the micro-needling module, you can effectively treat all areas of the skin with hyaluronic acid or with **mesoskinline** meso-cocktails products. The module consists six safe micro-needles, which stimulate the top layer of the skin (epidermis) in a mild and effective manner. Via micro perforations in the skin, micro-needles insert the active anti-ageing ingredients (**mesoskinline** meso-cocktails) creating natural and almost painless cell renewal. Cell renewal following a microneedling meso treatment leaves the skin tighter, improves its appearance and reduces wrinkles and minor imperfections.

Double effect with micro-needling module

- The needles create invisible microscopic holes, which activate the skin's own natural healing process, producing more collagen and elastin. This naturally increases the skin's resilience.
- Meanwhile, **mesoskinline** meso-cocktails flow into the skin already during treatment, not after the treatment (unlike many other micro-needling treatments). The skin therefore absorbs all of the vitamins and amino acids from the products optimally, while renewing itself. As the skin's barrier has been opened to active anti-ageing ingredients, additional ingredients from the MESO ANTI-AGE MASK used post-treatment are absorbed more effectively.

This improves the treatment result by approx. 30%, and allows optimum absorption of the active ingredients in the right quantity and in the correct skin layers.

ADVANCED MICRONEEDLING MODULE

for invasive microneedling treatment

Compatible: Advanced and other similar Handpiece
LaBina PL-1000 Mobil / LaBina PL-2000 Premium

Contents: Package with 8 modules
(6 x 0,7 mm metall needles)

Item no.: E-MM0001

The advantages for the patient are obvious:

- the redness fades away shortly after the treatment
- very low risk of infections, due to the rapid closure of the puncture
- negligible undesirable side effects
- minimal convalescence
- long lasting results
- equipped with a safety membrane and a tilting needle plate
- sterile and for single use only
- patented made in Germany
- easy access also to difficult areas due to the small size and tilting needle plate
- low epidermal trauma due to powerful skin penetration and strong needle force

NEEDLE ROLL 540

Micro needles with painless tip

NEEDLE ROLL 540

Micro needles
with painless tip

Contents: (1 box = 1 needle roll-handle
+ 2 needle roll recharges, 540 needles)

Item no.: Nr005

NEEDLE ROLL 540

Skin Needling is a regenerative dermatological technique. It is safe to perform on all skin colours and skin types.

There is no risk of subsequence inflamed hyper pigmentation. It is this safety function that separates Skin Needling from other invasive procedures for treating wrinkles and scars.

The technique is based on a simple principle: the normal healing reaction starts immediately when damage occurs to the tissue.

Blood components invade the injury area, and the blood plates make contact with the extra-cellular matrix.

This contact triggers the blood plates so that they release coagulation factors, essential growth factors and cytokines.

When the damaged area has been cleaned, the fibroblasts migrate to the injury area and produce and release new ECM.

The new collagen matrix is then cross-bound and organised in the final remodelling phase, which can last up to 12 months after the injury occurred.

Skin Needling with a skin roller produces hundreds of tiny injuries to the skin.

Each tiny injury triggers the normal healing process in the skin and through repeated treatment, new collagen builds up gradually and thus fills the deep scar and lines.

Generic regenerative face stimulation reduces the signs of photo-ageing and facial wrinkles (soft wrinkles).

Benefits

- With needles from 0.3 mm
- Generic regenerative facial stimulation
- Reduces wrinkles
- Reduces stretch marks
- Reduces abnormal pigmentation
- Reduces scars
- Reduces porosity

Sterile disposable heads consisting of 540 micro needles in stainless steel

- Needle Roll 540 head with its 540 micro needles allow you to cover a larger penetration area in a shorter time and can generate 1000 micro channels per square centimetres in ten minutes. This significantly increases the efficacy of the procedure.
- Stainless steel is scientifically proven to be the gold standard for tools that penetrate the skin.
- Needling Recharges have the same entry angle as subcutaneous needles, while Needling Roll 540 is diamond-shaped.
- The protective button gives you 100% protection against possible sources of infection. It is correct professional ethics to use disposable needle heads to reduce the risk of infections.

Needle heads/Recharges available with 540 needles in the following lengths

0,3mm, 0,5mm, 1,0mm, 1,5mm, 2,0mm.

Wrinkled Skin

Smooth Skin

Before

After

NEEDLE ROLL 540 RECHARGE

Micro needles with painless tip

Compatible: Needle Roll 540

Contents: Package of 6 pieces. disposable needle heads with 540 needles
Package with 8 modules

Item no.: Nr006
Select needle length
(0.3mm, 0.5mm, 1.0mm, 1.5mm, 2.0mm)

NEEDLE ROLLER 540 NEEDLE HEADS

Sterile needle heads for disposable use consisting of 540 micro needles in stainless steel.

With needles from 0.5 mm

- Generic regenerative facial stimulus
- Reduces the signs of medical imaging
- Reduces facial lines (soft wrinkles)

With needles from 1.0 mm

- Generic regenerative facial stimulus
- Reduces wrinkles
- Reduces stretchmarks
- Reduces abnormal pigmentation
- Reduces scars
- Reduces porosity and contrast adjustment

NEEDLE ROLLER 540 NEEDLE HEADS

540 micro needles allow you to cover a greater penetration area in less time and generate 1000 micro channels per square centimetre in ten minutes, significantly increasing the treatment's efficacy.

It has been scientifically proven that stainless steel is the gold standard for skin penetration tools.

The head in the NEEDLE ROLLER 540 NEEDLE HEADS Recharge is made of titanium with a new type of 200 micro needles, which means less pain and discomfort during treatment compared with standard derma rollers with round needles.

Single needle heads reduce the risk of infections

About mesoskinline

About mesoskinline

Non-invasive mesotherapy

mesoskinline is our specially designed concept in anti-ageing treatments - without medical intervention and related risk.

Our concept is based entirely on 100% safe, tested and certified products and equipment from the EU - your guarantee of impressive results.

It's essential for us that our clients feel safe when using the products and equipment we offer for treatments. It's the only way you can pass on the same peace of mind and trust to your clients.

The core of mesoskinline's specially designed concept consists of:

- Danish innovative thinking and our safe approach to treatment forms
- German quality and their uncompromising approach to producing quality equipment
- Italian focus on beauty and specially made formula for all our products

Based on our specially designed concept, we are able to offer the best possible treatment options with the guaranteed results that our clients dream of.

non-invasive mesotherapy

There is now an endless number of anti-ageing serums on the market, which you probably already know from treatments such as microneedling, laser and ultrasound technologies.

The formula of mesoskinline's meso-cocktails really stands out from existing products. For more than five years and together with laboratories and experts in Denmark, Germany and Italy, we have been testing a number of different meso-cocktails for use with non-invasive methods.

Through testing, we discovered a combination of ingredients that create the fastest possible results for our customers after just a few treatments, regardless of age, skin type and genetics. This led us to creating a range of products targeted at a number of specific problems - deep, fine lines in the skin, scars, pigmentation, stretch marks, hair loss and loose or dehydrated skin.

Mesoskinline's meso-cocktail formula was then tested and further improved at a renowned Italian laboratory to increase the efficacy and synergy of the ingredients. This means improved absorption in the skin and therefore an improved inals result.

About mesoskinline products for

Terms and conditions

PRODUCT HOT-LINE

If you have questions about our products before ordering **mesoskinline** products, feel free to contact us.

All our products already contain a technical instruction for use.

More detailed information about our products you can find at www.mesoskinline.com

You can apply to be created as a user at www.mesoskinline.com, to be able to see prices, discounts and make orders.

SUPPLY AND DELIVERY TIMES

Order delivery is via TNT or GLS, within 3-4 working days once the order has been received. **mesoskinline** takes no responsibility for meeting the desired and expected delivery time.

The Buyer must notify of any delays. Hereafter, the Buyer can only cancel the purchase if the Seller has not delivered within 10 working days following written demand to the Seller from the Buyer. The Buyer can under no circumstances claim compensation following a delay.

PRICES

All stated prices are in Euro without applicable VAT.

VAT is not charged to companies in the EU outside Denmark, which have a valid VAT number or to buyers in countries outside the EU. The goods delivered remain our property until all claims against the Buyer have been settled.

mesoskinline reserves the right to change prices without warning.

PAYMENT

Payment is required upon ordering. Payment is done using a credit card, PayPal or bank transfer. When paying by credit card, the amount will be deducted upon ordering

As **mesoskinline** only sells to distributors, resellers or buyers who use the products for commercial purposes, there are no cancellation rights.

WARRANTY AND DEFECTS

Any warranties for the products are described on www.mesoskinline.com. For defective goods under warranty, the warranty period is 2 years from delivery of goods to the Buyer.

Upon receipt of goods delivery, it is the Buyer's responsibility to perform the standard checks on the goods delivered, hereunder that quantities are correct and whether there are any obvious errors or defects. Complaints about goods that are defective or not according to contractual obligations, which the Buyer has or should have confirmed upon receipt of the goods, must be in writing form and sent immediately after the receipt of the goods, and under no circumstances later than 8 days after the receipt. Complaints must provide a clear description of the defect and enclose any photographic evidence if necessary.

The warranty is conditional upon the product being sent immediately the defect has been detected, and within 14 days, to the Seller free of charge, where claims must be raised within 12 months of the delivery date. Defects that should have been detected as part of the Buyer's duty to inspect the products cannot be claimed for after the above deadlines. At the Seller's discretion, defects on goods sold will either be remedied, returned or a refund for the goods sold will be credited to the Buyer.
